Claims Rejected

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 USC 102(b) as being anticipated by Kikuchi '232 and Tomisawa '710.

Kikuchi shows a method and apparatus for operating an automatic transmission and lockup clutch that includes an judgment of acceleration from both a rate of change of throttle pedal position and acceleration of the vehicle and selects an operating mode and shift pattern therefore. The shift modes include a power mode and an economy mode.

Tomisawa shows another method and apparatus for operating an automatic transmission by evaluating a number of vehicle condition parameters including rate of change of throttle pedal position, rate of change of vehicle speed and thereby selects a performance mode for the vehicle. The performance modes include heavy traffic, town road, and sporty modes. See column 6 beginning at line 29, through column 8, line 29.
